

Gail

Gail, 78, lives with her son Donald, 55, in Pine Ridge South. They are from Ocean County, moved to Florida, and then came back 13 years ago when Gail got a very good deal on this home. Gail's other two children also live in New Jersey and help where they can. Donald was a horse trainer but can no longer work in the field because of his asthma and heart problems. He uses a nebulizer regularly and cannot work. Gail has been battling cancer for 2 years and now receives radiation every day. Donald is her caretaker for now and drives her to all of her appointments.

Our team went out to replace the roof & windows, install flooring, and repaired the ceiling where they removed skylights.

Thank you to Project Home Repair for the funding of this project!

“ These repairs made a big improvement for my son because of his asthma now that we don't have carpet. I was terrified the roof was going to collapse sometime but now I don't have that worry. I am so grateful. ”
